SWYNEX – TASK 1

App Concept and Screen Flow

Productivity App Concept: StudyFlow

1. App Overview

App Name: StudyFlow
Category: Utility / Productivity
Purpose: StudyFlow is a simple student productivity app that helps users organize study tasks, create focused study sessions, and track daily progress in one place.

2. Target User

The primary target users are school and college students who want a simple way to organize their study tasks and maintain a regular study routine. The interface is designed to be easy for beginners and quick to use during busy academic schedules.

3. Main Features

Feature	Description
Task List	Add, view, complete, and organize study tasks.
Study Timer	Start a focused study session with a simple timer.
Daily Progress	View completed tasks and study time.
Quick Add	Create a new task without navigating through many screens.
Profile / Settings	Manage basic preferences and app settings.

4. Primary Screens (5 Screens)

Screen 1 – Home Dashboard

Shows today's study tasks, a quick progress summary, and shortcuts to start a study session or add a task.

Navigation: Home → Task List / Study Timer / Add Task

Screen 2 – Task List

Displays all study tasks with their subject, priority, and completion status. Users can mark a task as completed.

Navigation: Home → Task List → Select Task / Complete Task

Screen 3 – Add Task

Allows the user to enter a task title, subject, date, priority, and optional notes, then save it.

Navigation: Home or Task List → Add Task → Save → Task List

Screen 4 – Study Timer

Provides a focused study timer. The user can start, pause, resume, and finish a study session.

Navigation: Home → Study Timer → Start → Pause/Resume → Finish

Screen 5 – Progress

Shows daily and weekly study progress, including completed tasks and total focused study time.

Navigation: Home → Progress → View Daily/Weekly Summary

5. Screen Flow / Navigation

START	Open StudyFlow
↓	Home Dashboard
■■■	Task List → Add Task → Save → Task List
■■■	Study Timer → Start → Pause/Resume → Finish
■■■	Progress → Daily/Weekly Summary

6. Simple Wireframe Plan

SCREEN	KEY UI ELEMENTS
Home	App name • Today's tasks • Progress • Start Study • Add Task
Task List	Search/filter • Task cards • Subject • Priority • Complete checkbox
Add Task	Task title • Subject • Date • Priority • Notes • Save button
Study Timer	Timer display • Start • Pause • Resume • Finish
Progress	Daily summary • Weekly summary • Completed tasks • Study time

7. Design Goals

• Keep navigation simple so students can reach important actions quickly.

• Use clear labels and readable text for accessibility.

• Keep the number of primary screens limited to avoid unnecessary complexity.

• Make task creation and study-session tracking quick and straightforward.

8. Submission Note

This document contains the app concept, target user, five primary screens, feature descriptions, and navigation flow required for Task 1. A Figma design or sketch can be created from this specification and submitted along with the required repository or Drive link.
